### Recommendation Letter

It is my privilege to write on behalf of Prof. Laura M. Gorghiu and strongly support her advancement to position of Rector in Valahia University of Târgoviste. I know Prof. Gorghiu since I started our collaborative European project, about 8 years ago and I follow closely her work since then. Through all those years, her scientific work and her personality are like a light tower in the Chemical Education Community. She is a leader in her country and her university and leads the execution of innovative project in science education.

In our collaborative projects we were able to learn from her innovative integration of technology in education, and implementation of such innovative approach within science teachers. For example, the professional development conducted by Prof. Gorghiu and her team was strongly based on ICT tools and provided the other partner an example of best practice.

In addition to the quality research she conducts, her organization abilities that were demonstrated in the organization of the WPs in Valahia University of Târgoviste and in the organization of whole project meeting in Romania to advance the goals of the project.

I would, therefore recommend to nominate Prof. Laura M. Gorghiu to position of Rector in Valahia University of Târgoviste.

Best wishes

Prof. Ron Blonder
